

Abdulrhman W. ALkhouly

Abdowalkhouly99@gmail.com | (+20) 1157542859 | Menoufia,Egypt (Ease to relocate)

Military Status | Complete the service

Career Objective

Ambitious and driven Data Engineer seeking a challenging position to utilize my expertise in data warehousing, ETL processes, and cloud technologies. With a robust foundation in designing and implementing data pipelines, I am eager to apply my skills in machine learning and data analysis to support the success of a forward-thinking, data-driven organization like Target Company.

Education

Al Azhar University [Cairo], BS Computer Science September 2018 - September 2022

Major: Pure Mathematics & Computetr Science | **Minor :** Computer Science | **GPA:** 3.3

Relevant coursework: SQL,Data Structures and Algorithms,Al, Machine Learning, Database Systems, language programming(**C++,C,Py,opp java**),linear algebra ,Calculus, Statistics

Training Diploma

Intensive Code Camp (ITI) Information Technology Institute , June 2024 – September 2024
(MCIT) Ministry Of Communications And Information Technology, Data Engineering track , Menoufia branch

Skills Summary

Technical Skills.

1- Methodologies and Functionalities Concept in Data Engineering:

- **ETL / ELT Processes & Data pipelines:** Designing and implementing ETL pipelines and orcestration
- **Data Warehousing:** Data modeling and architecture ,Developing and managing Data warning and data marts data warehouses
- **Data Analysis:** Data cleaning, transformation, and analysis techniques
- Data quality assessment and improvement
- Data governance and compliance
- Big data processing and analysis

2-Tools and Technologies:

- **Data Engineering Tools:** Apache Airflow, Apache Spark, Kafka, Talend,SSIS
- **Databases:** MS SQL Server, MongoDB
- **Cloud Platforms:** AWS
- **DevOps Tools:** Docker, Jenkins
- **Programming Languages:** Python, C++,Java,SQL

Certification

AWS Academy Cloud Foundation | AWS Acaddemy
Machine Learning IBM | Coursera Platform

August 2024
January 2024

Projects

[Analysis Global Terrorism](#) |

The Global Terrorism Analysis project offers valuable insights into the global patterns and distribution of terrorism. Its findings help shape counterterrorism strategies, inform policy-making, and enhance awareness of the underlying factors driving terrorism, contributing to a clearer understanding of this critical global issue.

- Using analysis tools and libraries visuals (**Pandas,Numpy, Dask ,Matplotlib,Seaborn,Plotly,Python**)

[Union Bank System Data warehouse](#) |

Developed an ETL pipeline using SSIS to extract, transform, and load data into a centralized data warehouse from various banking sources. Integrated SSAS for advanced analytics and Power BI for dynamic dashboards to visualize key metrics and support data-driven decisions.

- Using ETL & visualize tools (SQL Server, SSIS, SSAS, Power Bi)

Real time Voting System |

This project simulates an online voting system to enhance voter accessibility and provide real-time updates on election data. It ensures data security with PostgreSQL and scales for elections of any size. The architecture uses Docker with Zookeeper & Kafka for data ingestion, Spark for real-time processing, and Streamlit for live visualization

- Tools used (Api Generator, Docker , Zookeeper & Kafka,PostgreSQL ,Apache Spark ,Python , Streamlit)

HR-Attrition Analysis |

HR-Attrition Analysis is a data-driven project aimed at understanding and analyzing the factors that contribute to employee attrition in an organization. The goal is to identify trends, patterns, and key drivers of employee turnover, helping HR teams to make informed decisions for improving employee retention and reducing attrition rates.

- Using analysis , cleaning and wrangling and visualization tools (Python, Pandas,Numpy,Power Bi)

Personal Skills

- Problem-solving and analytical skills
- Strong communication and interpersonal skills
- Ability to work independently and as part of a team

Languages

- Arabic (native)
- English (proficient)
- Spanish (basic)
