

Fatma Ramadan Ahmed

Data Engineer

Menofia-Egypt | +201010189124 | fatmaramadan663@gmail.com
in/fatma-ramadan | github.com/fatmaramadan225

Summary

Motivated and detail-oriented junior data engineer seeking to leverage strong analytical skills and foundational knowledge in data processing and ETL pipelines to contribute to innovative data solutions. Eager to collaborate with cross-functional teams to enhance data-driven decision-making and support business objectives while continuously learning and growing within a dynamic organization .

Education

- Bachelor's degree in Computers and Information from Menoufia University, Department of Information Systems, with a very good grade (GPA: 3.02)
-

Training Diploma

- **May-September (2024):** Intensive Code Camp (ITI) Information Technology Institute , (MCIT) Ministry Of Communications And Information Technology, Data Engineering Track , Monofia branch
 - **June-August (2022) :** Business Intelligence development trainee at ITI
-

Work / Experience

- **February - Present :** Data Analyst Freelancer
 - **September -October (2023) :** Data analyst trainee at MeriSkill
-

Skills Summary

- **Technical skills**
 - **Programming language :** python
 - **Database :** SQL server
 - **NoSQL :** MongoDB
 - **Big Data :** Apache Hadoop , Apache Spark , Apache Kafka
 - **ETL :** SSIS , Talend
 - **BI :** Power BI , Python libraires (plotly, seaborn, Matplotlib), Excel
 - **Tools :** Apache Airflow , Linux , Docker , Jenkins
 - **Concepts :** OOP, Data warehousing , Big Data
 - **Cloud Computing :** AWS (IAM , S3, EC2,VPCs , Lambda)

- **Projects**
 - **Real Time Churn Customer End-to-End Pipeline**

The project is a comprehensive data engineering solution. It demonstrates real-time data ingestion, processing, storage, and live analytic using a multi-cloud architecture. The project utilizes a combination of Apache Kafka, Apache Airflow, Pyspark, Hadoop, Hive, SQL Server, Azure SQL Database, Docker, and Power BI ([link](#))
 - **Gravity Books**

The Gravity Books Data Warehouse project involved designing a dimensional model using the Galaxy Schema to support complex reporting across multiple fact tables. SSIS was used for ETL to load data into the DWH, optimizing analysis and reporting for the business ([link](#))
 - **Global Terrorism**

open-source database that includes information on terrorist events worldwide from 1970 to the present ([Link](#))
 - **Customer churn**

The project analyzes customer churn patterns, highlighting the impact of contract type, geographic location, account length, and age demographics on churn rates.([link](#))
 - **Sales Analysis**

sales analysis dashboard is a visual tool that provides real-time insights into sales performance, trends, and key metrics to help drive data-driven decision-making. ([link](#))
- **Personal skills**
 - Presentation Skills
 - Teamwork
 - Time Management
 - Decision making
 - Communication Skills
 - Problem-Solving
- **Language**
 - English (good)
 - Deutsch (Basic)

Courses and Certificates

- **AWS Cloud Foundations** ([link](#))
- **Power BI Diploma** ([link](#))
