ABOUT ME

Enthusiastic Data Engineer with a strong skill set in SQL, Python, and data management. Experienced in working with RH Linux, Hadoop, and data warehousing solutions. Proficient in Airflow for workflow automation, Jenkins for CI/CD, and Apache Spark for big data processing. Familiar with Docker and AWS Cloud for scalable deployments. Eager to contribute technical expertise to innovative data projects and drive efficient data operations.

SKILLS

- SQL and database design
- data modeling
- Python
- Hadoop
- Data Warehousing
- RH Linux
- Docker
- Talend
- Jenkins
- Git
- Power Bi

INTERNSHIPS

DATA ENGINEERING INTENSIVE CODE CAMP (ICC)

Information Technology Institute (ITI) May 2024 - CURRENT

- Developed skills in database design and data modeling using Microsoft SQL Server.
- Applied Python for data processing tasks.
- Gained experience working with RH Linux and Docker for containerization.
- Utilized Hadoop and data warehousing (DWH) technologies for big data solutions.
- Implemented workflow automation using Airflow.
- Managed continuous integration and deployment with Jenkins CI/CD.
- Worked with NoSQL databases and AWS Cloud for scalable data solutions

EDUCATION

MENOUFIA UNIVERSITY

FACULTY OF SCIENCES

B.A in Physics and Computer Sciences

2016 - 2021

DATA ENGINEERING MASTERCLASS

Sprints

Jan - April 2024

- Gained hands-on experience with Data Engineering concepts, MySQL, and data management.
- Worked on data warehousing (DWH) and ETL processes.
- Utilized Hadoop and PySpark for big data processing.
- Used Docker for containerization and cloud computing platforms for scalable solutions.
- Created data visualizations and reports using Power BI.

LANGUAGE

- Arabic: Mother Tongue
- English: Proficient
