

Nour Adel

Cybersecurity Analyst

Email: nour.adel.demo@gmail.com | Phone: +20 155 123 4567

PROFESSIONAL SUMMARY

Analytical and detail-oriented Cybersecurity Analyst with 8 years of hands-on experience securing enterprise networks, performing penetration tests, and managing security events for organizations in financial and technology sectors. Proven track record in vulnerability assessment, incident response, and implementation of proactive security measures. Strong coding background in Python, skilled in Linux-based environments, and passionate about continuous learning in information security.

Adept at translating security findings into clear business recommendations.

EDUCATION

BSc in Data Science

Egyptian Institute of Technology, Cairo

Graduated: 2016

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst

Delta Secure Systems, Cairo, Egypt

Mar 2020 – Present

- Led end-to-end penetration testing initiatives for three major clients, identifying and remediating critical vulnerabilities that reduced security risk exposure by 36%.
- Developed custom security scripts in Python to automate log parsing, threat detection, and vulnerability scanning, improving incident response times by 40%.
- Configured and maintained SIEM tools (Splunk, IBM QRadar) to monitor network traffic, analyze security alerts, and generate actionable reports for IT management.
- Coordinated incident response for 12+ security events, performing root cause analysis and recommending network hardening strategies.
- Delivered security awareness workshops, training over 80 employees on best practices and phishing prevention.

Information Security Associate

Nexware IT Solutions, Cairo, Egypt

Aug 2016 – Feb 2020

- Supported the development and enforcement of security policies, standards, and procedures across Linux and Windows platforms.
- Conducted vulnerability assessments and provided actionable remediation plans to IT infrastructure teams.
- Assisted in implementing firewalls, IDS/IPS, and endpoint protection tools for enhanced network defense.
- Performed forensic analysis on compromised systems, preparing detailed documentation and reports for internal stakeholders.
- Collaborated with the software development team to review new application features for security compliance.

PROJECTS

Enterprise Security Audit for Financial Network

Led a comprehensive audit of a mid-size bank's network infrastructure, including firewall rulebase review, DMZ segmentation analysis, and application vulnerability scanning. Delivered a 40-page report with prioritized remediation actions, some of which were incorporated into annual IT planning.

Automated Threat Intelligence Aggregation Tool

Designed and implemented a Python-based tool that aggregates threat intelligence feeds from multiple open-source databases, automates IOC enrichment, and feeds the data into the SIEM. Reduced manual threat analysis and increased SOC response efficiency.

Internal Phishing Simulation Platform

Developed an in-house phishing simulation and reporting system for Delta Secure Systems. Conducted quarterly phishing campaigns, analyzed results, and created tailored training materials for teams. Noted a 60% reduction in susceptibility rates over one year.

TECHNICAL SKILLS

Penetration Testing:

- Kali Linux, Metasploit, Burp Suite, Nmap, Wireshark, OWASP ZAP

Security Monitoring & SIEM:

- Splunk, IBM QRadar, ELK Stack, LogRhythm

Network Security:

- IDS/IPS, Firewalls (Cisco ASA, pfSense), VLAN segmentation, VPNs

Programming & Scripting:

- Python, Bash, PowerShell

Operating Systems:

- Linux (Ubuntu, CentOS), Windows Server

Additional Tools:

- Git, Docker, JIRA, Nessus, Cisco Packet Tracer

CERTIFICATIONS

- CompTIA Security+ (Issued: 2017)
- (Additional certificates available upon request)

SOFT SKILLS

- Analytical Problem Solving
- Clear and Concise Communication
- Team Collaboration
- Time Management
- Adaptability
- Documentation & Reporting
- Training & Knowledge Sharing

References available on request.
