

Ahmed Zahran

Data Engineer

Cairo, Egypt (Easy to Relocate) | 01066397721- 01555977099 | Military Status (Exempted)

in/ahmedzahran74 ahmedzahran1899@gmail.com | github.com/Zahran22

Career Objective

Results-driven Data Engineer with over 3 years in financial services, specializing in scalable data pipelines, ETL optimization, and data integrity. Proficient in SQL, Python, Spark, and AWS with a strong background in financial data analytics with companies and individuals.

Work Experience

- **Contact Finical Holding, Relations Manager** Jan 2023 – May 2024.
- **Medical Mart, Sales Manager** Sep 2022– Jan 2023.
- **ALKEYADA for Works and Supplies, Sales Manager** Aug 2021 – Aug 2022.

Diplomas and Certificates

- May – Sep 2024 Intensive Code Camp, Information Technology Institute (ITI), Ministry of Communications and Information Technology (MCIT), Data Engineering Track, Menoufia Branch.

Education

- Bachelor's degree in communication and Electronics Engineering, Kafr Elsheikh University Class 2021.

Skills Summary

Technical Skills:

Programming: Python (pandas, matplotlib, plotly, dash, dask) | Web scraping (Beautiful Soup, Selenium) | Shell scripting.
Development Tools: VS Code | Docker | Jenkins (CI/CD) | Git | Linux
Data Engineering: Apache Hadoop, Spark, Kafka, Airflow | ETL (SQL Server Integration Services (SSIS), Talend).
Cloud: AWS EC2, VPC, S3, Lambda, IAM.
Databases and DWH: RDBMS (Microsoft SQL Server, MySQL, MariaDB) | noSQL (MongoDB) | Data warehouse modeling | Data lake
BI Tools: Power BI

Selected Projects:

1.Customer Churn Real Time Data Pipeline (ITI Graduation Project).

([GitHub](#))

Developed pipeline for customer churn prediction, utilizing PySpark for data processing across three stages:

- 1.Ingested data via Kafka and Airflow, storing the raw data in Azure SQL Database.
- 2.Applied classification models using PySpark ML, with results stored in SQL Server and visualized through Power BI.
- 3.Streamed the data into a Hadoop environment, using Hive SQL for querying and analysis.

2.Gravity Books ETL Pipeline.

([GitHub](#))

This project implements an ETL pipeline using SSIS for Gravity Books, extracting, transforming, and loading data into a data warehouse with reporting and visualization done through Power BI.

3.Union Bank ETL Pipline.

([GitHub](#))

This project builds an ETL pipeline using SSIS for Union Bank, extracting and transforming financial data, loading it into a database, and visualizing insights with Power BI.

4.Global terrorism EDA.

([GitHub](#))

This project conducts exploratory data analysis (EDA) on the Global Terrorism dataset in Python using libraries such as Pandas, Matplotlib, Seaborn, and NumPy to uncover insights and trends through data visualization and statistical analysis.

Personal Skills:

- Problem-solving.
 - Time Management.
 - Analytical Mindset.
 - Presentation Skills.
 - Communication Skills.
 - Teamwork & Flexibility.
-

Courses & Certificates

- [AWS Cloud Fundamentals.](#)
 - [Databricks Lakehouse Fundamentals.](#)
 - Associate Data Engineer in SQL. **DataCamp.**
 - Professional Data Engineer in Python. **DataCamp**
-

Extracurricular Activities:

- | | |
|--|------|
| • Former volunteer in Robotics Event in Kafr ElShiekh University | 2018 |
| • Former Volunteer in RESALA Charity Organization | 2016 |
-

Languages:

- Arabic (Native)
 - English (Fluent)
-
