OBJECTIVE

As an experienced data engineer with approximately 4 months of professional training through ITI and virtual internship programs in Data Engineering, I am eager to apply my expertise in designing, implementing, and optimizing data pipelines, architectures, data warehouses (DWH), Extract, Transform, Load (ETL) processes, and data visualization. I am confident in my ability to provide valuable insights and support data-driven decision-making for organizations.

EDUCATION

Data Engineering Track - Information Technology Institute (ITI)

May 2024 - Sep 2024

I gained expertise in designing and implementing data pipelines, as well as data warehouse modeling. Additionally, I designed and executed ETL processes to enhance data integration and efficiency.

Faculty of Computer Science, Menoufia University

Sep 2019 - June 2023

- GPA : very good (3.2), Graduation Project (Excellent)
- Former Head of student activity called "COMPILER" for more than 2 years.

EXPERIENCE

Data Analyst (Professional Training)

Mar 2024 - Mar 2024

Amit | remote

- Completed various data analysis programs, focusing on advanced analytical techniques and practical applications.
- Applied acquired knowledge to real-world scenarios, enhancing problem-solving abilities and analytical thinking.

Data Analyst Intern (Full Time)

Jan 2023 - Mar 2024

Arafa |

- Applied acquired knowledge to real-world scenarios
- enhancing problem-solving abilities and analytical thinking.
- Craft and execute queries upon request for data, and present information through reports and visualization using Power BI.

TECHNICAL SKILLS

SQL, Python, Data Analytics, Data Modeling, Pyspark, Hadoop, Microsoft Power BI, Data Visualization, AWS, Microsoft SQL Server, SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS), Data Warehouse (DWH), Extract Transform Load (ETL).

PROJECTS

- **Data Integration and ETL Pipelines** [\[github\]](#)

Design and implement end-to-end data integration and ETL (Extract, Transform, Load) pipelines using **python**. Show how you can extract data from different sources, transform it, and load it into the target data store.

- **Data Analysis and Visualization** [\[github\]](#)

Analyzing Netflix movie data using **SQL** and **Power BI** to create compelling visualizations. Designing interactive dashboards to showcase key findings.

- **Data Analysis and Visualization** [\[github\]](#)
Analyzing global terrorism data from various sources using **Python** and presenting the findings using charts for diverse groups of people.
- **Data Integration and ETL Pipelines** [\[github\]](#)
Telecom Company use case, Telecom solution is a set of ETL processes on the company files which include the data of the various transactions of the client. Create required database tables (**SQL**). Create a data warehouse. Create ETL processes using (**SSIS**).
- **Data Visualization and Reporting** [\[github\]](#)
The main objective of this project is to create a dashboard using **Power BI** to analyze Super Store sales data across various regions, occupations, and different factors that affect demand.
- **Data Pipeline using Airflow** [\[github\]](#)
Twitter Data Pipeline using **Airflow** extract data using Twitter API, use python to transform data, deploy the code on Airflow/EC2 and save the result on **Amazon S3**

SOFT SKILLS

- Strong Analytical and Problem-Solving Skills
- Effective Communication and Presentation Skills
- Teamwork and Collaboration

COURSES

- | | |
|--|----------------------|
| ● AWS Cloud Foundations | July 2024 - Aug 2024 |
| ● DataCamp Data Analyst with Power BI. | Mar 2024 - Apr 2024 |
| ● DataCamp Data Analyst with Python. | Jan 2024 - Mar 2024 |

CERTIFICATIONS

- | | |
|---|----------|
| ● Hacker Rank Certified: SQL Basic, Intermediate. | Aug 2024 |
| ● Database Fundamentals - Mahara Tech | Apr 2024 |
| ● Data specialization - Challenge track - Udacity | Sep 2023 |
| ● The Data Scientist's Toolbox | Jun 2022 |
| ● Biology Meets Programming: Bioinformatics for Beginners | Apr 2021 |
