- Phone Number: 01095130114

Career objective

Data Engineer skilled in building and optimizing scalable data pipelines. Proficient in ETL processes, data warehousing, and analytics with a focus on driving data-driven decision-making. Seeking to leverage my expertise to support business objectives in a dynamic environment.

Education

Banha University

Bachelor of computers and Artificial Intelligence “Medical Informatics” specialization.

GPA [3.66]

Start Date [Oct:2019]: Graduation Date [May:2023]

Graduation Project degrees: [Project1 (A+), Project2 (A+).]

Training

- Intensive code camp Information technology institute (ITI), ministry of communication and information technology.
Data Engineer trainee, Menoufia Branch. 5/2024 – 9/2024
- **Power BI diploma**, AMIT Organization, Creativa HUB Menoufia, ministry of communication and information technology. 4/2024 – 6/2024
- **Data Analysis internship**, Creativa HUB Menoufia, ministry of communication and Information technology. 10/2023 – 11/2023

Skill summary

Technical skill

- | | | |
|--------------------|------------------------|---------------|
| • Python | • Data warehouse | • Power BI |
| • Database Design | • Apache Spark | • Power Query |
| • Data Exploration | • Bigdata technologies | • Excel |
| • ETL(SSIS,Talend) | • Apache Kafka | • Docker |
| • Airflow | • NoSQL (MongoDB) | • Linux |

Projects

Graduation Project: (Medical records with Brain Tumors Detection Models):

- Get paperless medical records.
- Maintain patient confidentiality.
- Availability of the medical record for the permitted departments.
- The use of the model improves the accuracy of tumor detection for the physician.
- The use of the model to clarify the written prescriptions.

ITI Graduation Project: (show Platforms):

- Our Goal is to process data from multiple sources, ingest it using Kafka, transform it with Apache Spark, and store it in SQL databases for streaming analysis and reporting.

ETL Project: (Banking Transactions):

- ETL Project to extract Data from SQL server Database, make transformation with SSIS then load data to DWH.

Sales Data Analysis using Power BI:

- A deep dive into sales data, aimed at extracting valuable insights to enhance strategic decision-making using power BI.

Data exploration and Data cleaning on Global Terrorism dataset using python:

- Change data types.
- Replace null values.
- Splitting column into multiple columns.
- Remove duplication.
- Delete unused columns.
- Add Columns.

Personal skills

- Communication Skills
 - Team working
 - Time management
- Leadership
 - Problem Solving

Certificates & Courses

Organization: Datacamp. (07/2024-08/2024)	Associate Data Engineer in SQL.
Organization: Creativa Hub Menoufia/ Amit. (04/2024-06/2024)	Power BI Diploma.
Organization: Creativa Hub Menoufia. (10/2023-11/2023)	Data Analysis using Excel.

Language

- English: very Good.

Volunteering

IEEE BUB SB	
Logistics Team Member	10/2022– 10/2023
• Organizing events. • Successful event organization involves decoration, how all days of the event will be organized. • Creating a timeline is crucial for organizing events effectively. • Communication among team members is essential when organizing events
