Professional Summary

Cybersecurity Analyst with 6 years of experience in protecting enterprise infrastructure across banking and tech sectors. Skilled in network security, penetration testing, Python scripting, and SIEM administration. Recognized for developing effective phishing detection systems and leading incident response. Strong fundamentals in Linux environments and a proactive approach to evolving cyber threats. Cisco CyberOps certified and eager to contribute analytical expertise in dynamic security teams.

Education

BSc in Computer Science

Faculty of Computers and Information, Cairo Innovations University

Graduated: 2017

Professional Experience

Cybersecurity Analyst

Nile Secure Technologies, Cairo, Egypt

August 2020 – Present

- Led network security monitoring for 300+ endpoints, deploying SIEM rules for 24/7 visibility and incident detection.
- Conducted periodic penetration tests using Kali Linux and custom Python exploits, identifying and reporting on 45+ vulnerabilities annually.
- Implemented phishing response workflow, reducing response time to email attacks by 40%.
- Provided training to IT support and new hires on secure password practices and recognizing phishing attempts.
- Coordinated with vendors to update firewalls and maintain endpoint detection tools.

Junior Network Security Analyst

Cairo eBank Solutions, Cairo, Egypt

July 2017 – July 2020

- Supported security operations including alert triage and log analysis through QRadar SIEM.
- Automated detection of suspicious network traffic using Python scripts.
- Assisted in vulnerability assessments and patch management for Linux servers.
- Contributed to drafting monthly security reports for compliance audits.
- Collaborated with IT to address and close incident tickets within SLA.

Projects

Phishing Detection & Reporting Enhancement

2023

Designed and implemented an internal phishing detection system analyzing email meta-data and attachment patterns. Generated comprehensive monthly reports tracking trends, sources, and user susceptibility, leading to targeted training modules implemented across the organization.

Internal Penetration Testing Toolkit (IPT-Tool)

2022

Developed a custom Python-based toolkit for internal use during penetration tests, automating reconnaissance and vulnerability scanning for Linux endpoints. Reduced assessment times by 25% and standardized reporting for compliance needs.

Log Aggregation and SIEM Dashboard Automation

2021

Built automated scripts to aggregate logs from multiple network segments into a centralized SIEM dashboard. Enabled real-time visualization of anomalies and streamlined response workflows for the Analyst team.

Technical Skills

Network Security

- Firewalls (Cisco, pfSense)
- IDS/IPS deployment
- Network segmentation

Penetration Testing

- Kali Linux
- Metasploit
- Burp Suite
- Vulnerability scanning

Programming & Automation

- Python (automation, scripting)
- Bash scripting

Platforms & Tools

- Linux (Ubuntu, CentOS)
- Windows Server
- SIEM (QRadar, Splunk)
- Wireshark

Certifications

Cisco Certified CyberOps Associate (CCCA)

Issued 2019

Soft Skills

- Analytical thinking
- Attention to detail
- Effective communication
- Team collaboration
- Incident response under pressure
- Technical documentation
