PROFESSIONAL SUMMARY

Cybersecurity Analyst with 6 years of experience in penetration testing, network defense, and threat analysis. Extensive hands-on expertise in Linux-based security environments, scripting with Python, and monitoring through SIEM platforms. Adept in identifying vulnerabilities, strengthening digital infrastructure, and leading incident response initiatives. Skilled collaborator with a proven record of delivering actionable security insights and project leadership.

EDUCATION

BSc in Computer Science

Nile University, Cairo, Egypt

Graduated: July 2018

PROFESSIONAL EXPERIENCE

Security Analyst

TechShield Solutions, Cairo, Egypt

August 2020 – Present

- Conduct advanced penetration testing for banking and retail clients, uncovering critical vulnerabilities and delivering remediation plans to IT teams.
- Developed automated scripts in Python to streamline log analysis, rapidly identifying potential breach activity.
- Led deployment and fine-tuning of SIEM (Splunk) to enhance real-time detection of network intrusion and anomalous activity.
- Delivered security awareness training sessions to non-technical staff, reducing phishing incident rates by 35%.
- Prepared weekly network risk assessment reports for management and compliance teams.

Cybersecurity Junior Specialist

SecureBridge IT Services, Cairo, Egypt

July 2018 – July 2020

- Supported daily monitoring of enterprise networks, responding to alerts and escalating security events as required.
- Assisted in quarterly vulnerability assessments, utilizing Kali Linux and Metasploit to test web applications and infrastructure.
- Collaborated with the incident response team during simulated attack exercises and post-event analysis.
- Documented best practice guidelines for new security software deployments.

PROJECTS

Phishing Detection System & Awareness Report (2023)

- Designed and implemented a Python-based phishing email detection tool utilizing natural language processing and heuristic analysis.
- Generated a comprehensive report for company leadership outlining detected trends, impact analysis, and mitigation strategies.
- Resulted in a 50% decrease in successful phishing attempts post-implementation.

Network Penetration Testing Lab (2021)

- Developed an isolated virtual lab on Linux for conducting hands-on penetration tests of proprietary software and simulated environments.
- Authored detailed findings for DevOps and QA teams, informing application updates and improved security policies.

Real-time Threat Monitoring Dashboard (2020)

- Built a customizable SIEM dashboard for real-time tracking of security events and log aggregation.
- Integrated alerts for unusual outbound traffic and automated notification systems, reducing response time to incidents by 20%.

TECHNICAL SKILLS

Penetration Testing: Kali Linux, Metasploit, Burp Suite, Nmap

Network Security: Firewalls, IDS/IPS, Wireshark, TCP/IP protocols

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Programming & Scripting: Python, Bash, PowerShell

Monitoring & SIEM: Splunk, AlienVault, ELK Stack

Vulnerability Management: OpenVAS, Nessus, Nikto

CERTIFICATIONS

CEH Foundation (Certified Ethical Hacker - Foundation Level), 2022

SOFT SKILLS

Analytical Thinking | Problem Solving | Team Collaboration

Report Writing | Attention to Detail | Communication Skills

Initiative | Time Management
